

**COMPANY NAME**  
**RESTORATION TECHNICIAN – ONLINE EMPLOYMENT**  
**ADVERTISEMENT**

Come work for a company that makes a difference. We restore homes and businesses that have been damaged by fire and other disasters. We are a strong team that works together to repair property and restore people's lives. We are looking for skilled restoration technicians. With a background in cleaning, laundry, construction or other related industries.

We are a rapidly growing company. Our growth is the result of performing quality work, providing exceptional customer service and the quality of our team. Our business is rewarding and fast paced. Your position carries a lot of responsibility and is necessary in managing our client's expectations and meeting our production benchmarks. Send a short letter explaining why you are the ideal candidate for this position along with work history and education history.

**Overview:** The restoration technician is responsible for assisting the production department with completion of cleaning, contents, mold remediation and water-related projects. Due to the nature of the work, often the job sites will be dirty, possibly cold or wet and sometimes unsanitary. All attempts will be made to accommodate requests of workers exposed to these conditions. The work can be very challenging, fun and rewarding. A good attitude, professional work practices and a desire to help people in need are requirements for the job.

**Overall Responsibilities:**

Customer service; Pack out and transport of customer contents; Water damage emergency response and monitoring; Mold remediation; Structure cleaning; Duct cleaning; Laundry; Bio-hazard cleanup; Job clean up; Completion of detailed job records.

**Some of Your Duties May Include:**

- In plant contents processing:
  - Remove all residue and odor from contents
  - Follow warehouse procedures for cleaning, handling and storing contents
  - Repack contents after they have been cleaned
  - Washing, processing and packing laundry
- On location cleaning:
  - Clean smoke residue from contents and structure
  - Post construction cleaning to prepare a house for occupancy
  - Keep the job site clean and professional. Leave the job site clean at the end of the day. Organize and remove all cleaning tools and supplies from the property.
- Water damage services
  - Water extraction and removal of water damaged materials
  - Move affected contents
  - Set up and monitor drying equipment
- Mold remediation
  - Set up and maintain containment

- Bio Hazard cleanup

General Requirements:

- Being available for routine on call emergency services and after-hours work.
- Drivers license
- Clean, insurable drivers record.
- Drug test.
- Back ground check

Physical requirements:

- Must lift heavy items up to 50lbs on a routine basis
- Employees will be working with cleaning, deodorization and antimicrobial products on a daily basis. Gloves, respirators and splash goggles are available for use.
- Employees may be required routinely climb ladders and work in high places.
- The workspace may be contaminated with heavy smoke residue, mold and mildew, contaminated water or other unsanitary conditions. Protective gear is available for use and is required on some heavily contaminated work sites.
